

July 17, 2018

To the Valued Customers of Leader Industries:

Since 1975, Leader Industries has earned your trust by providing high-quality life safety solutions for HVAC systems. Aire Technologies seeks to do the same.

Aire Technologies, Inc. is a DMI Company who has been committed to providing a full line of high-quality life safety products in southwestern Pennsylvania. We have been in business since 2004 building fire dampers, ceiling radiation dampers, wood truss classified (UL 263 tested and approved) enclosures for multi-family construction, combination fire and smoke dampers, smoke dampers, air control dampers, and access doors. We have two manufacturing facilities: one in Monongahela, PA and another in Wagoner, OK to best satisfy the demands of our customers.

I am excited to announce that Aire Technologies, Inc. has entered into an agreement to acquire the life safety and louver product lines designed by Leader Industries. The following Leader Industries products will soon be manufactured by Aire Technologies in Monongahela, Pennsylvania:

- Out-of-wall combination fire/smoke dampers for noncombustible construction
- Grille-access ("Front-access") combination fire/smoke dampers for noncombustible construction
- Airfoil-blade-style combination fire/smoke dampers
- Corridor dampers

Aire Technologies is updating all design files including Revit and CAD drawings, installation instructions, and submittals to accurately model the Leader Industries designs. New files will be available shortly on Airetechnologies.com.

In addition to the life safety dampers, Aire Technologies will soon offer all of the louver, penthouse, gravity ventilator, and hood products and their associated certifications. These will be manufactured in Wagoner, Oklahoma.

If you have any questions about this exciting news and what it will mean for you, please feel free to contact your local sales representative, found on Airetechnologies.com. Our office is also standing by ready to field your questions at the phone number listed below or at ATIOrders@airetechnologies.com.

We look forward to working with you!

Sincerely,

Michael Florian
Business Development Manager
